The course aims to provide with the necessary qualification for the handling of internal audits within the shipping company.

Audits are discussed in the context of ISM, ISPS and MLC.

The course aims at providing the participants with the appropriate knowledge and skills to perform the activities of development and maintenance of the Inventory of Hazardous Materials (IHM).

Participants will acquire basic knowledge of the status and main features of the regulatory framework for ship recycling and learn the responsibilities imposed to shipping companies from the regulations.

The course is developed in accordance to the EMSA Guidance for the training required for HAZMAT Experts.

A virtual tour onboard for sampling/checking of hazardous materials is included.
